

Tells you every time, where people, vehicle or other valuable things are.

Informed by SMS, made visible by Google Maps and other mapping SW

Today, most people know GPS. By Satellite communication, you can fix every point at earth and see where you are, and how you will reach your target. Our GPS-Tracker is the logical development of this technique. It gives you the ability, to know every time, where people, vehicles or valuable goods are right in this moment.

Its a perfect product for more safety and protection.

1. Children

If a child takes a "Lighttower" with it, you can always ask for the position with an accuracy of up to 5 meters. Simply call him by phone and you receive an SMS with the Geo-Data. Enter Google or another supportet Mapping software with this code and you see exactly, where the child is.

2. Elderly People

No matter if your parents or partner are shopping, talking a walk or are on a trip to friends and family: you always know, whre he/she is. If in trouble, they will press one of two alarm buttons and an SMS with the Geo-Data will be sent directly to your phone or an emergency central.

3. Pets

Dogs, horses or other big pets carry the "Lighttower" with them around the neck or in a bag. If they run away, you don` t need long time to search them. Simply call the "Lighttower" and you will receive the SMS within a few seconds. This will safe you hours of search an pounds of nerves.

4. Vehicles

For any kind of vehicles, we offer this and a more specific model, the "Lighttower Vehicle). It will be installed into the car, boat, yacht, oldtimer, express unit or whatever and can be located any time. You can also check the current position of shipments and loads, can check the location of drivers and of course stolen goods.

For security companies and fleet management is an online tracking by a website

possible. With the code of each tracker you can identify the number online on the card and always check the route and position. For larger fleets, external servers can be installed.

5. Athletics

No matter if you are climbing in the mountains, go skiing or are cruising with a boat. The alarm button sends a signal of your exact position, when you are in trouble. And if your beloved are in sorrow about you, they can always check your position - if you like. This can save your life and health.

For use, you need a simcard. The "Lighttower" works in some cases similar to a mobile phone.

The Features:

- "Lighttower" sends its position by SMS to a mobile phone or server
