

Converts negatives and dias into Digital Photos

Do you have nice souvenir photos at home? Its hard, but as older they are, the more the quality fades away. Dump colors, scratches, yellow patches make the worthful remembering a source anger. Family parties from years ago, holidays with children, the first car or house, marriages, child birth and much more are in danger, to be lost in the sands of time.

Digitalf photos still have the same quality. No scratches, no yellow patches, no untrue colors. Once stored, they never change. In 20 years, they look the same as today.

With our "**Catcorner Roll2Digi 2**" you bring both worlds together. You simply put the negatives or dias inside of the tray, press a button and in a about a second, the photo is digitised and on your computer!

If your negaitves or dias are still damaged, you can refresh them with the software, which is included in the shipment. You may of corse work with all other picture editors, too.

The product can be imprinted, engraved and the giftbox is customizable.
