

## Shaking Torch

### **Shake it, Baby! 1 minutes shaking - up to 30 minutes bright lights**

Here she is, the torch without batteries, which will make easier. A small dynamo inside generates the energy, which is stored in a capacitor. That means: no batteries, no pollution and no money to power the product.

She has a lifetime from up to 10 years (probably more), looks nice, is lightweight and available in five different sizes. The included LED has a lifetime of up to 100.000 hours and the light can be seen up to 1.000m. She is waterproof, impact resistant and can be branded on different positions. The weight is around 100g for the 17cm model.

Imprint is possible, giftboxes in custom design no problem.
