

The new Ionizer for the USB-Port

Do you feel refreshed after work? Certainly not. Do you have allergies or permanent colds and wish to have a nice smelling office which gives you a good feeling?

Use our USB-Ionizer to get a great result. Because of his strong ionizig field, he filters dust, dirty in the air, bacteria, polls and bad smell. Even electrostatic decreases.

We were very sceptical in 2001, when we tried the first model. But still this older product surprised us and forced us to push sales until today.

It can be branded in different ways, also the giftbox. Depending on the quantity, you can choose other colors.
